PROJECTS

GRADUATION PROJECT "ARRIVAL" MOBILE APPLICATION AND WEBSITE

the arrival app, which functions similarly to the Swivel app but with trains that allow users to book and track their trains in addition to our control website to monitor the train's status and pay for tickets as our payment method. Along the way, we've learned how to integrate plenty of new things into our Flutter applications, including Firebase, Google services, maps, authentication, SMS OTP verification, real-time applications, flutter custom Painter, MQTT client, and GitHub, including GitHub deployment, and android studio Environment.

Fake book store

A responsive Book store website is built with REACT JS , TAILWIND CSS and FLOWBITE REACT

In React JS : I have experienced with components , SWIPER , HOOKS (useState , useEffect),react-icons.

Fake store website

It is a fake store website which is built by html , CSS , JavaScript , Bootstrap
